

Delhaven Community Center ASES Programs

We Miss You!

As Delhaven ASES staff get together and talk , we understand that this is a time of much uncertainty. What we all know for sure is that we MISS all our students and want to find ways to keep everyone feeling connected to afterschool. In an effort to do that, we will be launching various online videos and grade level worksheets to keep our students learning, engaged and mentally and physically healthy.

We can be found online through multiple portals. Our Content we will be posted throughout these various platforms.

Hand Hygiene

Washing your hands is easy, and it’s one of the most effective ways to prevent the spread of germs. Clean hands can stop germs from spreading from one person to another and throughout an entire community—from your home and workplace to childcare facilities and hospitals.. Follow these five steps every time.

Wet your hands with clean, running water (warm or cold), turn off the tap, and apply soap.

Lather your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.

Scrub your hands for at least 20 seconds. Need a timer? Hum the “Happy Birthday” song from beginning to end twice.

Rinse your hands well under clean, running water.

Dry your hands using a clean towel or air dry them.

LOS EXTRANAMOS

Mientras el personal de ASES de Delhaven se junta a platicar, entendemos que este es un tiempo de gran incertidumbre. Lo que todos sabemos es que extrañamos a todos nuestros estudiantes y queremos encontrar maneras de que todos se sientan conectados al programa de ASES. Con gran esfuerzo, vamos a empezar varios videos y hojas estudiantiles para mantener a nuestros estudiantes aprendiendo. Queremos que nuestros estudiantes estén mentalmente y físicamente saludables a través de estos videos y formularios.

Nos Pueden encontrar en la red Social a través de múltiples portales. Nuestro contexto va a estar puesto dentro de nuestros varios portales

HYGIENE DE MANOS

Lavarse las manos es fácil, y es una de las maneras más eficientes para prevenir el contagio de gérmenes. Manos limpias tienen el poder de parar el contagio de gérmenes de su hogar a su lugar de empleo a instalaciones de cuidado infantil y a hospitales. Por favor siga estos cinco pasos para lavar sus manos.

1. Mojese las manos con agua limpia. No importado si está el agua caliente o fría. Apague el agua y pongase Jabón
2. Enjabone sus manos y lave los lugares exteriores de sus manos, en medio de sus dedos, y bajo de sus uñas
3. Refriegue sus manos por al menos 20 segundos. Ocupa un minutero? Cante la canción del cumpleaños "de comienzo a final" dos veces
4. Enjuague las manos bajo agua limpia
5. Seque las manos usando una toalla limpia o séquelas a aire libre.
